News And Informations (4/5)

by Chester of Brainstorm

Here comes a little sensation: For less than $1000 IBM will produce a homecomputer with the following dates: Intel 80286, VGA (256 colours by 640 * 480 pixles), CD-ROM. It will come out at the end of this year. The softwarefirms from America will soon release games for this new machine, and perhaps there will start a new scene... (Rumours are around about an Intel 80386 instead of a 80286!) That sounds funny, a scene on a IBM-computer!

APPLE wants to produce a home-computer, too.

3 members of **IT** joined the **CRYPTOBURNERS**: Gladiator (Sound), Walkman (Sound), Tec (Code). Now, 18 members.

TMB left his old group **PULSAR** to join **SCOPEX**.

Bustman left **ERRORS** and joined **CRUSADERS**.

ARCADIA TEAM is dead.

The first Transputer-card with Inmos T800 Transputer for the AMIGA 2000 will be released by X-PERT.

CINEFEX is a new group formed out of members of **AFL**.

Nimitz left **TAT** to join **HUMANOIDS**.

Rumours about Onyx: He should have joined **RAZOR 1911**.

The AMIGA 500 has won the first 'Oscar' for computers, as best European computer.

The AMIGA 3500 is in work. It should be again a computer with an Motorola 68030, but this time with 40MHz or more.

News from **Scoopex**: SCOPEX Finland is working on their newest demo called: "CHRONIUM" Two austrian members were kicked out (BIGOT20, SYNTECH). SCOPEX Austria is working on a new demo called "GLORY STARS II". Coming soon: 1 BBS in Austria,

2 BBS in Germany. *RANGER&BLERIS/SCX*

RED SECTOR is working on an own Soundtracker.

All stupid things (jokes!) we wrote about the CJ are of course not true. We thought that they understand them, but they didn't. (*BRS*)

The Gfx-card for the AMIGA 2000 is finished. Maximal resolution: 848*610 pixles in all 4096 colours but you need an Muliscan-Monitor.
