### \*\*\* EDITORIAL \*\*\*

Here we are again with another issue the jokes and humour was badly trans-  
of <sup>2</sup>FOURTH DIMENSION <sup>1</sup>, this time more lated, but fear not; The problem is  
colourful than last. We received a lot probably located inside certain brains  
of good criticism for the mag, but I from Norway... For next issue I would  
was most satisfied with all the const- find it nice if members from different

destructive critics we received. We have groups wrote to us with the history of tried to fulfil every readers desire, their crews, it would be nice to have and we hope you will be satisfied with a sort of "collection" where you could our upgrades. As you probably noticed, read about your favourite (?) crews! I last issue was crammed with bugs. hope it will be possible to go through Certainly we've fixed the bugs known with this idea, it all depends on you! to us, but if there should occur any After our first issue was released, a more bugs, please report them. This lot of people have written to <sup>2</sup>FOURTH <sup>1</sup> issue will contain a lot of stuff from <sup>2</sup>DIMENSION <sup>1</sup> concerning swapping. Please, the <sup>3</sup>Cryptoburners, It & Visual Arts <sup>1</sup> if you want to swap with <sup>0</sup>CRYPTOBURNERS <sup>1</sup>, easter party in Drammen 7.04 - 10.04 write to one of our swappers and not to this year as this was the first step our P.O. BOX!! I cannot send back disks taken by the Norwegian police against to people who don't write anything for Software Piracy. Also this issue will this mag! I'm sorry, but the work would contain some party reports and our kill me! So please, if you want to get regular columns. I hope there's some- in touch with us for swapping write to thing for everyone's taste. From last one of our swappers. People sending issue some of our readers asked whether articles, however, can expect to get their disks back with the latest iss. his inspiration from the game. They of <sup>2</sup>FOURTH DIMENSION <sup>1</sup> as soon as it has were however so similar that one easily been finished. So if you want to help could make that mistake.... us making this mag even better, write In this issue of <sup>2</sup>FOURTH DIMENSION <sup>1</sup> we some articles for us, and we will get started a new column, the DUNGEONS OF back to you as soon as possible! The DIRT. This is a chance for groups to subject is for you to choose, whether slag each other off. The only thing we you want to write party reports, news, ask of the people writing in is that scene reports, interviews with you, you should present facts, not just yourself and others, about your mum/ saying "you are lame coz you are lame". dad/girlfriend/boyfriend etc., tales We will ofcourse not censor anything, of your group or anything else, it's that's our politics. up to YOU! It would also be nice if we Having said that I feel I must say got some graphical contributions and that this issue was a few days delayed perhaps also a musical contribution or because our coder is a high school two wouldn't harm us either. Remember, graduate and has had some problems with if you want your art published, WE'RE time. So now you know... the one to go to! We hope you enjoy this issue of this I would also like to grab this mag as it's quite a lot of work making opportunity to correct some few things it. With these words I say:

from last issue. In our demos corner, - GOOD READING READERS....

we reviewed Humanoids' Madplayfield.

We then said the graphics were ripped <sup>a</sup>Blackstar/Cryptoburners <sup>1</sup>

from a game, this was not true. The

#### THE BIDIRECTIONAL SCENE <sup>1</sup>

In the beginning of the 90's there a game and not everyone wants to either seems to have been a lot of changes in but if you desperately want a game or a the scene. More and more people seem program, you don't mind waiting just a to discover that games aren't the few weeks so the software companies can "ultimate fun" and they start to look make some money on the game before it's at demos again. The opposite side goes getting widely spreaden all over the more and more for profit. Cracking and globe. Having said this, I want to give selling cracked warez seems to blossom some regards to crews like Red Sector, even as the software police get closer Scoopex Finland, Phenomena, Level Four on their tails. Fame gives an urge for and so on for feeding us with nice and even more fame, or so it has been said above everything, homemade stuff. This a long time ago. I belong to the part is what's needed to get back to the of the scene which prefers a good demo 'good-ol' days' which perhaps wasn't so to a good game. I don't have any games good but certainly better than today! (yes it's true!) and I don't need them The word 'lamer' has been used a lot! either. I find it ridicilous that guys I don't know what most people put in like Quartex, M.A.D, Paranoimia etc. that word but, correct me if I'm wrong, exploits people like they do and it's a lamer is said to be a guy who does even more ridicilous that people nothing but playing games all day and actually want to buy cracked stuff who's trading 3-month-old software with from these or any people at all. OK, I his peasant contacts. Well, the word agree that cracking isn't just bad! might fit, but what about finding a Not everyone can afford paying £30 for fitting word for all the people finding themselves too good for 'lamers'? Is most common interpretation agrees with a freak cooler than others because he our interpretation!) Still BJ Electronics is able to get a game 1 day before his (The biggest importer of software in contacts even though he buys the game Norway), who's leading an intense fight from the crackers, thus supporting against piracy in Norway has crossed their illegal activities? I will leave the line. First of all they stopped a this question unanswered. Everybody's copy party in Norway where they used 2 probably got their own views on that (YES TWO!!!) hours to find evidence of matter, but I advise you to think thru illegal copying, secondly because they,

your activities. Is it really worth in their campaign against piracy are going to prison just because you have using adverts in Norwegian computermags copied a few games? Is it really worth copied directly from FAST's ads in UK risking a future career because you mags. This in itself isn't illegal as thought it was cool to be 'first with the original ad probably wasn't the hottest'? Is a game really bad copyrighted, but the text itself is! just because it is two weeks old? It's It says that you risk 3 months in jail up to you to give the answers to that. for copying and this is NOT a fact! We We are open to hear your views if you took the liberty of examining this with want to express yourself. some barristers and they claimed it was I wish to give you non Norwegians illegal even to advertise for something something to think about. Today's which definitely isn't true. Until the copyright laws are written such, that new copyright laws appear in Norway, copying a game is legal if you copy it there's nothing to fear (We can NOT for private use (This depends a little guarantee this however), but things are on how the laws are interpreted, the getting hotter and hotter as time goes by. We cannot expect to see the same from the event, and only a few days police activities here in Norway as later Fraxion released a their chainsaw Germany, France etc. has got (my guess demo, a whole-disk demo containing some only!) because the Norwegian police quite nasty executions of the BJ guys. don't quite like the idea of locking All the BBS' in Norway (PD and PC BBS's up 'innocent' kids when there are so too) the word spread immediately and many rapes, murders, robberies etc. people are encouraged to buy their soft This does not mean the won't do it, so from outside of Norway, thus boycotting to all Norwegians.... A good advice is BJ Electronics. BJ started this war! to be very careful in the future. Our They're gonna have to pay for it too! problem is that the so called experts We in CRYPTOBURNERS will encourage all from the importers don't know shit people in Norway to either buy their about the legal scene, they think all stuff from CITY COMPUTER CENTER in Oslo stuff is copyrighted, be it demos or or from dealers NOT stocking BJ's warez whatever. Until this change the police (This is easy to check, just look at will grow more and more weary of the the price tag! If it says Scandomatic, scene. They believe more in people it's ok to buy the stuff. If not, don't their own age; adults! There's an evil buy it!) or by ordering it from foreign circle going and until now, the freaks companies. Help us letting BJ pay for have been silent. Now however, things their thoughtless actions against us! are beginning to change! After the Boicott them!!! police raid on the party in Drammen <sup>a</sup>Blackstar [Cryptoburners] <sup>1</sup>

in April a lot of things happened. The day after the party Crusaders released Read the letter from Milkshake/Kefrens a slideshow with digitized pictures which illuminates my point of view!

#### LETTER SUPPORTING MY VIEW <sup>1</sup>

I take the liberty of publishing parts of a letter received by Milkshake/Kefrens the other day. This supports my view on how the scene should be like. I think you should read this and learn from it! After all, friendship and fun is what we all want and need most from our hobby. I hope you don't mind me doing this man! I think many people can learn from this.

¢\* Well, when the new SUPER-MEGA-GROUP (As they called it (Alias PARADOX)) was about to be formed, the danish leader of PARADOX (Midnight Maniac) Phoned: PROMAX, METALLION and DETRON - He told them about HIS (!) new group which he said would be the BEST group ever. He also told them that his group would knock everybody else's socks off. So he convinced the before mentioned KEFRENS members that the only group worth beeing a member of, in the future would be the "elite only" group - PARADOX.

And what happend - They joined the fucking group the very next day! SHIT!

KEFRENS DIED !!!!!!!!!!!!!

BUT I (Yes, MILKSHAKE) Re-founded KEFRENS one day later.

I also found a couple of new cool members.

Anyway, only 2 (Yes, T W O) days later PROMAX, METALLION and DETRON called me and asked if they could join KEFRENS again - I said YES, but asked them WHY? Well they had been thinking alot lately, they said. And they had come to the conclusion that you should give FRIEND-SHIP and FUN a higher priority than SPEED and FAST-CRACKS. (HOW TRUE!!!)

So they joined KEFRENS again, and they will NEVER leave anymore.

#### MEGA COMPETITION <sup>1</sup>

Fourth Dimension is proud to present a Next issue of FOURTH DIMENSION will new competiton and it's a simple one present the winners of this megagreat too. #### CRYPTOBURNERS - The Full Story <sup>1</sup>

Cryptoburners was founded in 1988. except from The Wiz, who found it to be  
Some of the members were together on too much work to disconnect his Amiga.  
the CBM-64 earlier too, but the name We sacked him! (This was not the only  
CRYPTOBURNERS appeared in 1988. The reason!). The meeting was very success-  
C64 activities of the group were done ful, and just a few weeks before the  
under several names, names unknown to meeting, two new members had joined us;  
most of you. The first demo from CRB CINZANO and SUPERTED. Just one month  
was released at the Stj ørdal-party later, six members left for the RAWHEAD  
held by RAZOR 1911 - ABNORMAL - THE IT & THE BAND copy party in Arendal and  
CARTEL. At that time, noone had ever there we released our first megademo  
heard the name CRYPTOBURNERS, and by which came second, only beaten by IT.  
coming second in the demo competition Here we also made some big decisions  
we startled many people. Members at concerning our group; we sacked some  
that time was: WINDWALKER, HEATSEEKER members. Superted, Cinzano and Beatboy  
TRIXAL, THE WARRIOR, TIME TRAVELLER, was sacked because of lame activities,  
HEADACHE, BLACKSTAR, THE WIZ. About a The Warrior went ahead and died. A new  
month later two new members joined in name did also occurred in the group when  
They were BEATBOY and VECTORMAN. The Headache changed his name to BIMBEX! We

christmas passed and we were doing a were now seven members left: Bimbex, little bit of work on our forthcoming Blackstar, Heatseeker, Time Traveller, megademo. Then, in February 1989, we Trixal, Vectorman and Windwalker. Two held our first meeting (Windwalker's months passed before our next gathering place), and all members were there, in May 1989 at Blackstar's place. Here we coded our first game, a conversion released another demo, Around The World of an old C64 classic: Gridder. We Another period of silence fell upon us, released this and stayed quiet until the only things coming from us was some the IT/RAZOR 1911 copy party in June Cryptopacks. A bit earlier (In August), 1989. Here we attended the demo compo Time Traveller had released all his with a single part demo featuring some songs on a musicdisk, originally titled vectorballs and so on, and we won this (??) Music Collection 1. This was done competition. Only three members were as a side job, as no other member knew there. After this, a period of silence before it was released! Anyway, the came over us until September 1989 when the result turned out pretty well. That we got a lot of new members. After was all that happened in 1989 but in hours and hours on the phone, a group January 1990 we released yet another called Ghostriders decided to join us. music disk, the Music Party 1990 disk. We were then fifteen members, and they On the side of that we were working were: Aggressor, Bimbex, Blackstar, like hell to fix everything for our Bugbear, Crescendo, Heatseeker, party, and we were occupied with the Jackmix, Kylerion, Orgasmus, Oscon, first issue of FOURTH DIMENSION. The Rhesus Minus, Time Traveller, Trixal, time before the party went quickly, and Vectorman and Windwalker. Only a few soon it was ...PARTY-TIME!! At least we days after the joining we released our had hoped it would be (Read about that second game, Skyfight, another C64 elsewhere!). We got three new members: conversion. We also started to plan a WALKMAN, TEC and GLADIATOR, all of them copy party which we were about to hold from IT! We are currently working on a in April 1990. Some months passed, and new megademo, the CRYPTOBURNERS SECOND Crescendo died. A few weeks later, we MEGADEMO.

The danish scene is very active at the moment, with lot's of cool groups and begun to create games, like: KEFRENS, weird people ! DEXION, TRILOGY and REBELS (?) and I am at the moment (no order): Anyway, there seems to be a little problem here in Denmark, 'coz every- time a new group has begun to become cool, most of them join another group which is bigger and better. And becource of this, it's very seldom you see any new danish groups which reaches the top and then stays there. Anyway, I think the danish scene is very nice and most of the groups know each other and chats quite often over the phone. And nearly all danish groups show-up everytime there's a copy-party arranged. I'm really Sorry about this fucking

have also got their own BBS'. text, but I wrote it in a hurry.  
 We have also got some quite famous  
 coders here in Denmark, like: PROMAX,  
 MR. MEGA MIND, METALLION, LITEACE etc. ø[Milkshake/Kefrens] 1

#### SOME POETRY!

Yo, all you little heavyhairs, not to speak of all you blockbrains. This is the (as always) very great Fallos. The reason why I'm writing this, is that there was only one (!) great article in the last pissue of 4TH DIMENSION, so I decided to write one for this issue too. To be honest, it is a very nice thing of me to do..... You really should appreciate it, Cryptoburners.

As the rather smart ones of you may have discovered (don't be sorry if you didn't, Jackdick, 'cos I didn't expect you to), this article is called 'SOME POETRY'. So, here we go with the first one. It is in norwegian, but that really doesn't matter 'cos most of you people are norwegians. Cryptoburners don't have that many foreign contacts.

#### GEDANKEN UBER SCHAFE

Jeg drepte en sau  
og nar den var helt dau  
Reiv jeg av den ulla  
og gjett hva den var full av  
Deilig mens fra topp til taa  
huttetu da fikk jeg staa!

Meaningful, or what??? I've also made a english version of this poem, but it is actually quite different. Here it is:

#### GEDANKEN UBER SCHAFE II

I fucked a sheep  
real, real deep  
    It cried out for mercy  
but it didn't disturb me  
I just gave a damn  
and pulled out its lamb!

Nice.... And now a little story of what happened to me this other day.

I was standing at the bus-stop, with this lady by my side.  
She was looking very pretty, so I said "I want you tonight"  
She hardly moved her head, when she said to me :  
    "If it's starting to rain, maybe then we'll see...."  
But, get no funny idea, because I'm not for free,  
if you want my pussy, you must buy the whole of me."  
    I said : "money I have lots of, you can have a few  
but never forget, to do what I tell you to!"  
Then it started raining, it was my lucky day,  
she followed me home, and we begun to play!  
So i asked her; "will you suck me?"  
She said "such things I do not do"

I said "baby do not worry, I will suck you too!"  
But as she started sucking, my big, fat dick,  
    she said, "mister, I am sorry, I've got AIDS,  
and now you're real sick!

What a sad story, eh? Shall I tell you a secret? I didn't happen to me,  
but Jackmix told me not to tell everybody about his private life, so I had  
to pretend it was me it happened to... Satisfied now, Jackmix?????

And here we go again, with another, original Fallos poem:

I was walking in the park, some lovely day,  
when I think real hard, it must have been mid-may.  
I was looking for love, a place to put my dick,  
then it came from above, struck my heart, made me sick!  
It was a lady so lovely, never seen her likes,

she sat down beside me, and pulled out a knife.  
"Mister, do not move! Just do what I say!  
I only like eunucks, so I'll pull down your trousers, if I may???"  
What the hell, did I have any opportunity, did i have any chance?  
It was, after all, love at first glance.  
The decision was easy, she cut it off all,  
but the next day she left me, with only my hole....

It is the new trend to be a eunuck now. Oh, you didn't know? Well, just  
try it, and find out how many trendy mini-sized undies you can wear! And  
there's always some lesbian girl or an other eunuck you can marry.

To salute all the eunucks of the world, I've made another eunuck poem!

I was hunting bananas, in the land with no name,  
and had to eat them alone, until SHE came!  
She took off my trousers, I touched her bread,  
but as she pulled out her knife, there was a bloodshed!  
She cut of my dick, I'm a eunuck now,  
but I hope it will, grow out somehow....

That was that, as we say here in Norway. The dirty job is done, and I only  
have to say "thanx for me" (norwegian expression).

you. Well Soundwave is a new UK group, 1521 HD Wormerveer  
and is formed by: Marc (painter) so he Holland.  
is the great leader. (Like he said the  
Back bone). We first were chaos but Yep, I know that Soundwave is an UK  
split up coz some of us joined Oracle group, but I'm the only Dutch member. I  
So we are now Soundwave (well the am a musician and look for some more

people who have not joined Oracle). over sea contacts, so if you're intere-  
 Soundwave will make basically music sted then write me. OK some nice words:  
 for groups without musicians, and the I'm glad that some people make more  
 only thing we ask are credits and a music editors, coz Soundtracker get  
 special hello. We also make music for more boring every day. I think there  
 software companies, but that has are so many versions of it, so people  
 nothing to do with you, but okay, I have over used it, but Soundtracker is  
 think this magazine is really fantastic better 1.5 year ago but still boring.  
 (????? - Ed). Sorry for being boring, well Future-Composer by the Superions  
 but I really don't know what to tell is really great to work with so thanx  
 you! well.. I could tell ya my address guys for making it, could you please  
 for some demo swaps, or music swaps. contact me for it? Well, I should stop  
 By the way, Soundwave is a part of for letting other people talk some  
 Phoenix, so greet us as Phoenix. Okay, better words than me. See ya next iss.  
 my address is, if you want to trade: STP of Phoenix for Cryptoburners

But Buddy Buttocks and Andy Ashtray BBUUUURRRPPPPPP....und zu weiter. is gaining on Ickbrain, only three days after. And now, a commercial. Buy our CODERS CORNER <sup>1</sup>

Well, here we are again. I must thank you readers for an enormous response to my work! (Did you hear the ironic sound of that??) So if I don't get any feedback to this article to the next couple of 4-Dim. issues, I think it's time to finish off... It is now up to you if you wanna keep these pages in the forthcoming issues of 4th Dimension! Ok, enough complaining for this time, and let's move on to the subject of this time's CodersCorner; øRotations & Vector Graphics <sup>1</sup>

## VECTOR GRAPHICS <sup>1</sup>

In the last year the popularity of using 3D structures and algorithms in games and demos has grown extremely fast. Nowadays must a demo, if it is to be considered good, contain some form of 3D calculations. Normal Vectors (3D & 2D), filled vectors, 3D starfields, chessfields, vectorbobs etc. is some examples of such effects. The realm of computercalculated 3D graphics is very impressing, and the maths lieing behind these considerations may look complex to those not having been in touch with the phenomena. <sup>2</sup>BUT, if you dare <sup>1</sup> to use some time, studying the basics of 3D programming, you will soon find that it is really quite simple.

## THE SIMPLICITY OF ROTATION <sup>1</sup>

Whenever 'vectors' are mentioned, the word 'rotations' follow. The object of vectorgfx is not to display still-pictures in a 3D perspective, but to display the shape from different angles of view. In demos this is done in a geometric way as the object is 'rotated' around the three axis, creating a live animation. In order to achieve this, we must first find a formula for adding an angle  $\pm V^\circ$ , ofcourse relative to a given centre, to a given point  $P(x,y)$ . To be able to do this, we must know some facts about the general Sinus and Cosinus to the angle. Now look at the illustration above. Of the drawings, you (should) understand that in a circle of radius 1.0, the definition of Sinus is:  $\sin V = Y/\text{hypotenus}$ . <sup>1</sup> That is:  $Y = \sin V/1 \Rightarrow Y = \sin V$ . The same for Cosinus:  $\cos V = X \Rightarrow X = \cos V$ . This is general forms and is true for any radius by multiplying the coordinates with the radius. We want to find a formula for rotating the  $P(x,y) \pm V^\circ$ : By studying the drawings and known rules for Sin/Cos we find this formula: Rotating  $\pm V^\circ$  gives us new coords (origo centered):  $P(X,Y) = (X \cdot \cos V - Y \cdot \sin V, X \cdot \sin V + Y \cdot \cos V)$ .

## USING THE KNOWHOW IN 3D LIFE <sup>1</sup>

Ok folks, now we know how (rim & rytme) to rotate a point 2 dimensional. The nice thing is that we now also know how to rotate points with 3 coords. When we rotate a 2D point, we really do nothing but rotating the point in the XY-plane of the 3D coordinate system! By using our formula on the YZ- and XZ-plane too, we have rotated the point  $P(x,y,z)$  an angle  $V$ (XY-angle),  $U$ (YZ-angle) and an angle  $W$ (XZ-angle)! So there you are, simple isn't it? The complete algorithm is:

Starting point  $P(x,y,z)$  - Ending point:  $P(X,Y,Z)$ :

$V = XY$  angle

$U = YZ$  angle

$W = XZ$  angle

$(x_0, y_0, z_0)$  are just helping points

$$(x_0, y_0) = (x \cdot \cos V - y \cdot \sin V, x \cdot \sin V + y \cdot \cos V)$$

$$(y_0, z_0) = (y \cdot \cos U - z \cdot \sin U, y \cdot \sin U + z \cdot \cos U)$$

$$(x_0, z_0) = (x \cdot \cos W - z \cdot \sin W, x \cdot \sin W + z \cdot \cos W)$$

By collecting the red coordinates we get the final, rotated point:  $P(X,Y,Z)$

Ok, so much for rotating. Now all you have to do is to make a 3D to 2D converter! Next time I'll show you some nice 3D/2D conversion routs and hidden lines, with filling and surface shading!
